Spectrum Oil Containers

Quality Engineered Systems | [www.jsgindustrial.com](http://www.jsgindustrial.com)

Spectrum Oil Containers offer users an excellent way to keep lubricants free from dust, dirt, water and other machine-damaging contaminants. They play an important role in the lubrication supply chain, especially between bulk containers and top-off points, which industry experts indicate to be the most common source of contamination.

<b>TRANSFER</b>	The colour coded nozzle lids are available in 3 different spout diameters, feature an easy to use twist system, allowing for accurate flow control.
<b>DISPENSE</b>	Multiple handles to assist carrying and dispensing, while the shape of container fits ergonomically against the forearm.
<b>STORAGE</b>	Compact design allows for a small foot print. The nozzle lid design has two positions; forward for pouring and rear facing for storage.

## DESIGN

## UNIQUE FEATURES

1. Handles contain contour finger grips to provide a comfortable & secure hold
2. Contoured containers fit forearm to distribute weight of container
3. Square design allows for stability when using hand pump
4. Compact footprint takes up less storage space
5. Easy twist on/off breather vent provides hands-free control with no strain on thumb

## COLOUR SYSTEM

The Spectrum® Oil Containers promote a fully integrated visual lubrication management system that improves productivity and efficiency. The system enables operators to identify lubricants, while ensuring accurate and consistent delivery. The Spectrum Oil Container lids are available in 10 colors. In addition, a secondary color option is available with the Breather Vent. Secondary colors can be used when there are more than 10 different lubricant types within the plant to identify. Other usages for secondary colors are to indicate viscosity grade, lubrication frequency, or base oil type.

These robust and durable containers feature a wide opening for rapid no-spill filling and will fit any lid. The containers are semi-transparent with graduated markings along the side making lubricant level easy to see.

Note: Containers come standard with black breather vent

## NOZZLE LIDS

All Spectrum® Oil Container lids are interchangeable with the containers. Lids contain a Buna-N o-ring to seal lubricant from the external environment. The nozzle on each lid contains textured areas that provide a comfortable slip-resistant grip.

### 1" Nozzle Lid

Ideal for topping-off engines, cranks, and other areas where higher flow is required.

## ACCESSORIES

### Pump Storage Lid

This multi-purpose lid allows rapid pouring of oils, making it ideal for topping off machinery such as crankcases or large engine blocks.

### Hand Pump

Ideal for awkward or hard to reach oil top-off applications such as gearboxes, lathes, and milling machines. Supplied with outlet hose and anti-drip nozzle. P/N 07-34463

### Breather Vent

The Breather Vent is available in ten colors to coordinate with lid color or to use as a secondary color option. Containers are supplied with a black Breather Vent as standard.
